

Australia Melbourne

I'm incredibly grateful to have participated in the "Australian Ecology and Culture Study Tour." This overseas experience not only broadened my horizons but also helped me overcome my fear of language in an English environment. I also had in-depth conversations with my host family, where I experienced authentic local customs. Through our visits to cultural facilities and natural landscapes, I gained a deeper understanding of the importance of protecting the ecological environment. Finally, I'm especially grateful for the "Pilgrim of Faith" Scholarship from Sheng Kung Hui and the school's support, both of which made this dream come true.
