

GOOD DAY

6K YEUNG LOK IN

During my twelve-day trip to Australia, I discovered a place with a culture, climate, and geology vastly different from what I'm used to in Hong Kong. My breath was actually visible in the morning air! What's more! Australian dairy products are exceptionally delicious. Thanks to the country's abundant milk production, ice-cream is incredibly affordable. Kangaroo meat is also a regional delicacy, widely available throughout Australia. My host family was wonderfully welcoming. We even had a small barbecue together, enjoying delicious marshmallows while watching a movie.
